May 2017

To the director of environmental approvals branch, with Manitoba Sustainable development.

Attached is the notice of alteration form,

Our current release window is very short and early (May 2 - May 31). This has been very troublesome for us in the past. Due to ice coverage if the release window was changed for an appropriate time period later preferably would work a lot better to be able to discharge the wastewater with out complications or passing our discharge window. Qllum applications are often needed for the breraton Lake Lagoon.

This process shortens our window as well.

I would also like to remove the TC limit from the license as well.

Thank you!
